DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 and 17-28, drawn to an ultrasonic cleaning tank, classified in class 310, subclass 323.18.
 - II. Claims 12-28, drawn to method of cleaning electronic components using an ultrasonic transducer, classified in class 310, subclass 328.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the ultrasonic cleaning tank does not require the ultrasonic transducer to be mounted to the upper portion and the method of cleaning can be performed using a cleaning tank without flanged perimeters.

It should be noted that claims 17-28 would be examined with any elected group.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
